

## **DRAFT List of Flood Mitigation Needs**

**TO:** Lower Brazos Regional Flood Planning Group      **DATE:** 11/30/2021  
**FROM:** Sam Hinojosa, PE, CFM      **AVO:** 43794  
**EMAIL:** sHinojosa@halff.com  
**SUBJECT:** **DRAFT** List of Potential FMSs, FMEs, and FMPs

---

The Regional Flood Planning Group (RFPG) must identify and evaluate potential Flood Management Evaluations (FMEs) and potentially feasible Flood Mitigation Strategies (FMSs) and Flood Mitigation Projects (FMPs). These identified Flood Mitigation needs will be further evaluated and final recommendations of FMEs, FMSs, and FMPs will be made to the Texas Water Development Board (TWDB) as part of Task 5 which will begin early next year. The following preliminary list has been prepared according to Task 4B and outlines the current Flood Mitigation needs that have been gathered for the Lower Brazos Region. **This list is subject to change as further evaluation is performed during the planning process.** This preliminary list is being provided as a snapshot to the RFPG to preview what Flood Mitigation needs have been collected and are being considered.

An updated detailed draft Flood Mitigation needs list will be submitted to the RFPG prior to the December 14 meeting. Along with the list, a draft Technical Memorandum summarizing progress and deliverables will also be provided to the RFPG for approval. The final draft Technical Memorandum will be submitted in January 2022 that will include a refined list as required in Task 4B.

Any Flood Mitigation needs that are not included in this document can be sent electronically to [rLondeen@halff.com](mailto:rLondeen@halff.com) for consideration. To ensure a submitted Flood Mitigation need meets the requirements outlined by the TWDB, please provide the following information where applicable:

- Any supporting hydraulic or hydrologic modeling.
- Any supporting studies or documentation.
- Current status of the evaluation, strategy, or project.
