

# Draft List of Potential FMSs

An FMS is a proposed plan to reduce flood risk or mitigate flood hazards to life or property. There is flexibility within the definition; it is used as a “catch-all” category. Some types of FMSs are listed below:

- Education & Outreach Programs
- Flood Preparedness & Resilience\*
- Infrastructure Improvements\*
- Maintenance & Inspection Programs
- Nature Based Projects\*
- Regulatory & Guidance
- Property Acquisition and Structural Elevation\*

\*Although some categories are similar to FMPs, the FMSs tend to be “big picture” efforts over individual projects.
